#### INTRODUCTION.

This bulletin presents in condensed form the main results of the enumeration of the population as of the date of April 15, 1910, which relate to the number of inhabitants, and their distribution over the territory of the United States. It will be reprinted in full in the Abstract of the Thirteenth Census.

The bulletin contains the final results of the census of the population as to the number of inhabitants enumerated in each state, county, and city or incorporated place of 2,500 inhabitants or more. For the states comparative figures are given back to the first census in 1790; for counties and cities the comparison is confined to 1910, 1900, and 1890.

In connection with the population of states and cities considerable attention is given to the increase of the population, especially in the last decade. A table is

also presented showing the population for apportionment purposes, which according to the Constitution excludes Indians who are not taxed.

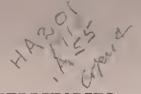

The bulletin shows further the distribution of the population between urban and rural communities, together with the growth of population in urban and rural territory. It also further distinguishes the urban population by different classes of communities grouped according to size. The importance of the suburbs of the larger cities is shown in the calculation of what are designated metropolitan districts, including the urban population residing within approximately 10 miles of the cities having over 200,000 inhabitants.

The tabular statements of the census results on these various subjects are found in part throughout the text and in part at the end of the bulletin.

### POPULATION—UNITED STATES.

### POPULATION OF THE UNITED STATES AND OF STATES AND TERRITORIES.

Area of enumeration in 1910.—The Thirteenth Census of the United States was taken by the Bureau of the Census as of April 15, 1910. The total area enumerated includes continental United States, the territories of Alaska and Hawaii, and Porto Rico. The enumeration also includes persons stationed abroad in the military and naval service of the Gov-

ernment (including civilian employees, etc.), who we specially enumerated through the cooperation of the War and Navy Departments.

The following table gives the total population for the area enumerated in 1910. The correspondincensus figures for 1900 are also given for purposes o comparison.

AREA.	1910	1900
The United States (total area of enumeration)	93, 402, 151	1 77, 256, 630
Continental United States	91, 972, 266	75, 994, 575
Noncontiguous territory	1, 429, 885	1, 262, 055
AlaskaHawaiiPorto RicoPersons in military and naval service stationed abroad	64, 356 191, 909 1, 118, 012 55, 608	63, 592 154, 001 2 953, 243 91, 219

Includes 953,243 persons enumerated in Porto Rico in 1899.
 According to the census of Porto Rico taken in 1899 under the direction of the War Department.

The rate of increase from 1900 to 1910 was 20.9 per cent for the total area of enumeration and 21 per cent for continental United States. It should be noted that this table does not cover all the outlying possessions of the United States. Including the population of the Philippines and other possessions, the population living under the American flag is approximately as follows:

Population of the United States and possessions. 101, 100, 000

Enumerated at the census of 1910. 93, 402, 151
Philippine Islands, 1903. 7, 635, 426
Guam, estimated. 9, 000
Samoa, estimated. 6, 100
Panama Canal Zone, estimated. 50, 000

Continental United States.—The population of cortinental United States is 91,972,266. Compared wit the population of 75,994,575 in 1900, this represent an increase during the past decade of 15,977,691, c 21 per cent. The rate of increase was slightly greate than during the preceding decade, 1890–1900, when i was 20.7 per cent.

The table following shows the population of continental United States as enumerated at each censular from 1790 to 1910, inclusive, together with the increase and percent of increase during each decade, and also adjusted percentages of increase explained in the paragraphs below.

CENSUS YEAR.	Population of continental	INCREASE OVER I		Adjusted percentages
	United States.	Number.	Per cent.	of increase.
1910 1900 1890 1880 1870 1860 1850 1840 1830 1820 1810 1800 1790	91, 972, 266 75, 994, 575 62, 947, 714 50, 155, 783 38, 558, 371 31, 443, 321 23, 191, 876 17, 069, 453 12, 866, 020 9, 638, 453 7, 239, 881 5, 308, 483 3, 929, 214	15, 977, 691 13, 046, 861 12, 791, 931 11, 597, 412 7, 115, 050 8, 251, 445 6, 122, 423 4, 203, 433 3, 227, 567 2, 398, 572 1, 931, 398 1, 379, 269	21. 0 20. 7 25. 5 30. 1 22. 6 35. 6 35. 9 32. 7 33. 5 33. 1 36. 4 35. 1	21. 0 20. 7 24. 9 26. 0 26. 6 35. 6 35. 9 32. 7 33. 5 33. 1 36. 4 35. 1

In considering the changes in population as reported by the census it is to be noted that Indians and other persons in Indian Territory and on Indian reservations were enumerated for the first time in 1890, so that the figures for that census are not strictly comparable with those for 1880 and preceding censuses. To show correctly the rate of increase of population from 1880 to 1890 it is necessary to eliminate 325,464 Indians and other persons from the figures for 1890,

which leaves a population of 62,622,250. This figu shows an increase over 1880 of 12,466,467, or 24 per cent.

The evidence is clear that there was a marked deficiency in the enumeration of the population in t. Southern states in 1870, resulting in an understatement of the increase from 1860 to 1870 and an overstatement of the increase from 1870 to 1880. There is no mean of ascertaining accurately the extent of the deficiency,

but an approximate estimate of the true population in 1870 was made in the census report of 1890 (Population, Part I, pp. xi, xii, and xvi) by which the population in 1870 was placed at 39,818,449 instead of 38,558,371. Using this figure the increase of 1870 over 1860 would be 8,375,128, or 26.6 per cent, and the increase of 1880 over 1870, 10,337,334, or 26 per cent.

Summarizing, it may be said that the population of the United States showed approximately an increase of one-third during each of the seven decades from 1790 to 1860; of one-fourth during each of the three decades from 1860 to 1890; and of one-fifth during each of the last two decades, 1890 to 1900 and 1900 to 1910.

<sup>1</sup>A minus sign (-) denotes decrease.

Divisions and states.—The population of the United States by divisions and states, with their rank according to population at each Federal census from 1790 to 1910, inclusive, is shown in Table 1, on pages 4 and 5.

The growth of the population of continental United States by divisions and states in the last 20 years is shown in the above table, while the map on page 6 shows the per cent of increase of the population in each of the states during the last decade, different rates of increase being indicated by differences in shading.

The table and map show that there are 11 states in which population has increased more than 50 per cent since 1900, as follows: Washington, Oklahoma, Idaho, Nevada, North Dakota, New Mexico, Arizona, Oregon, California, Wyoming, and Montana. Four divisions—the Pacific, Mountain, West South Central, and Middle Atlantic—increased in each of the last two decades more rapidly than the country as a whole. With one exception (the West South Central) these divisions with a high rate of increase from 1890 to 1900 grew still

faster from 1900 to 1910, and divisions with a relatively low rate of growth in the former decade grew still more slowly in the latter decade.

The following table shows the per cent of the total population of continental United States in each geographic division at the censuses of 1910, 1900, 1890, and 1850, the latter being added as representing conditions shown by the first census taken after the last of the important accessions to the territory of continental United States had taken place:

<sup>7</sup> The territory of Oklahoma in 1900 ranked 38 and Indian Territory 39. The rank for 1900 includes the population of Indian Territory with that of Oklahoma.

8 Alaska was specially enumerated under the law, but the population was not included in the general report on population in 1880.

9 According to the census taken as of Dec. 28, 1890, under the direction of the Hawaiian Government.

<sup>10</sup> According to the census of Porto Rico taken in 1899 under the direction of the War Department.
11 Persons in the military and naval service of the United States (including civilian employees, etc.) stationed abroad, not credited to any state or territory.

PER CENT OF INCREASE IN TOTAL POPULATION, BY STATES: 1900-1910.

Apportionment of representation.—The following table gives for 1910 the population of each state, exclusive of Indians not taxed, who, according to the Constitution, are not to be included in the population forming the basis of the apportionment of representatives among the several states. The population of Arizona and New Mexico is not included in the main table but

is added as an appendix. These territories had not yet become states when the apportionment act of 1911 was passed, though provision for their representation was made in the act. Now that they have been admitted as states the total apportionment population of the states, exclusive of Indians not taxed, and not counting the District of Columbia, is 91,569,325.

Dasis of apportion ment.   Dasis of apportion, 1910.   Dasis o

As the count of population is made primarily for the purpose of fixing the membership of the House of Representatives, under the provisions of section 2 of Article I of the Constitution, as modified by section 2 of Article XIV of the Amendments, a statement is given in Table 2 of the number of Representatives assigned to each of the states under the several apportionment acts from the formation of the Government to the present time.

The membership of the House of Representatives was originally fixed at 65, under the provisions of section 2 of Article I of the Constitution.

The apportionments of Representatives in Congress, under the first six censuses—1790 to 1840, inclusive were made by Congress, each by a separate act.

The law for taking the census of 1850 (act of May 23, 1850, 9 Stat. L., 428), which was intended to be permanent, presented a rule of apportionment, fixed the number of members of the House at 233, and directed the Secretary of the Interior thereafter to make the apportionment. The apportionment under the census of 1860 was also made under this law, but Congress, on March 4, 1862, fixed the total number of members at 241, and the Secretary of the Interior apportioned the new quotas to the states.

The apportionments from and after the census of 1870 were made by Congress, each by a separate act; hence it may be assumed that the power conferred on the Secretary of the Interior by the act of May 23, 1850, was repealed by implication.

Table 2.—NUMBER OF MEMBERS IN THE HOUSE OF REPRESENTATIVES UNDER EACH APPORTIONMENT.

<sup>(17</sup> Stat. L., 192).

Membership increased from 233 to 241 by act of Mar. 4, 1862 (12 Stat. L., 353).

Membership increased from 233 to 234 by act of July 30, 1852 (10 Stat. L., 25).

### AREA AND DENSITY OF POPULATION.

Area.—At the First Census, in 1790, the United States comprised substantially the territory between the Atlantic Ocean and the Mississippi River except Florida, representing a gross area (land and water surface) of 892,135 square miles. The United States, with its outlying possessions, now comprises a gross area of 3,743,306 square miles, or more than four times the area in 1790. The successive accessions of territory were as follows:

ACCESSION.	Gross area in square miles.	ACCESSION.	Gross area in square miles.
Continental U. S.  Area of U. S. in 1790¹ Louisiana Purchase, 1803 Florida, 1819 Territory gained through Treaty with Spain, 1819. Texas, 1845 Oregon, 1846 Mexican Cession, 1848 Gadsden Purchase, 1853	3,026,789 \$92,135 \$27,987 58,666 13,435 389,166 286,541 529,189 29,670	Outlying possessions  Alaska, 1867. Hawaii, 1898. Does not include the water surface of the oceans, the Gulf of Mexico, or the Great Lakes, lying within the jurisdiction of the United States.

Population per square mile.—The following summary shows, for continental United States, the total population, land area in square miles, and population per square mile of land area, at each census since 1790:

CENSUS YEAR.	Population of continental United States.	Land area in square miles.	Population per square mile.
1910 1900 1890 1880 1870 1860 1850 1840 1830 1820 1810 1800	38,558,371 31,443,321 23,191,876 17,069,453 12,866,020 9,638,453	2, 973, 890 2, 974, 159 2, 973, 965 2, 973, 965 2, 973, 965 2, 973, 965 2, 944, 337 1, 753, 588 1, 753, 588 1, 753, 588 1, 685, 865 867, 980 867, 980	30.9 25.6 21.2 16.9 13.0 10.6 7.9 9.7 7.3 5.5 4.3 6.1 4.5

According to the census of 1910, there are in continental United States, on the average, 30.9 inhabitants to each square mile of land area, or nearly seven times the number per square mile shown for the much smaller area of 1790, and nearly three times the number shown for 1860. The decrease in the average number of inhabitants per square mile at the censuses of 1810 and 1850 was due in each case to large accessions of thinly populated territory during the preceding decade.

The relative density of population of each state of continental United States in 1910 is exhibited by the map on the opposite page, while the table shows, for each state, the population and land area in 1910 and the population per square mile at each of the last three censuses.

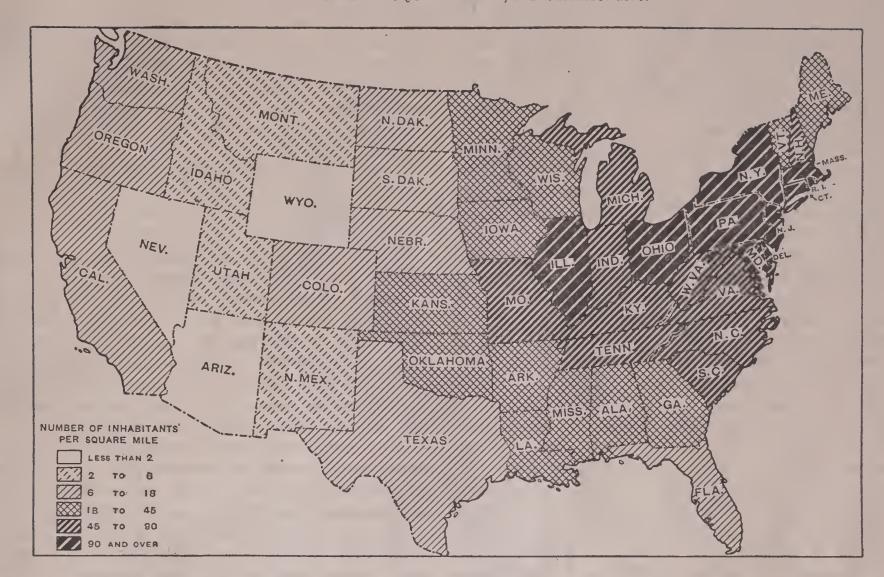

In the order of density of population the nine geographic divisions rank as follows: Middle Atlantic, 193.2 inhabitants per square mile; New England, 105.7; East North Central, 74.3; East South Central, 46.8; South Atlantic, 45.3; West North Central, 22.8; West South Central, 20.4; Pacific, 13.2; Mountain, 3.1.

Aside from the District of Columbia there are 10 states in which there was in 1910 a population per square mile of more than 100. These states, in the order of density are as follows: Rhode Island, Massachusetts, New Jersey, Connecticut, New York, Pennsylvania, Maryland, Ohio, Delaware, and Illinois.

There are 16 states which have, on the average, less than 18 inhabitants to the square mile. Eight of these states are in the Mountain division (comprising its entire area), 3 in the Pacific division (comprising its entire area), 3 in the West North Central division, 1 in the West South Central division, and 1 in the South Atlantic division.

Among the outlying possessions Alaska has an average density of only 0.1 per square mile; Hawaii, 29.8, about that of Arkansas; and Porto Rico, 325.5, or greater than that of any state of continental United States except Rhode Island, Massachusetts, and New Jersey.

### CENTER OF POPULATION.

On the basis of the Thirteenth Census returns the center of population and the median point for continental United States have been determined for April 15, 1910. In these calculations no account is taken of the territory and population of Alaska and of other noncontiguous territory.

The center is often understood to be the point of intersection of a north and south line which divides the population equally, with an east and west line which likewise divides it equally. This point of intersection is, in a certain sense, a center of population; it is here, however, designated the median point to distinguish it from the point technically defined as the center.

The character of these two points may be made clear through a physical analogy. The center of population may be said to represent the center of gravity of the population. If the surface of the United States be considered as a rigid plane without weight, capable of sustaining the population distributed thereon, individuals being assumed to be of equal weight, and each, therefore, to exert a pressure on any supporting pivotal point directly proportional to his distance from the point, the pivotal point on which the plane balances would, of course, be its center of gravity; and this is the point referred to by the term "center of population," as used in this bulletin. In determining the median point distance is not taken into account, and the location of the units of population is considered only in relation to the intersecting median lines—as being north or south of the median parallel and east or west of the median meridian. Extensive changes in the geographic distribution of the population may take place without affecting the median point, whereas the center of population responds to the slightest population change in any section of the country.

At the Thirteenth Census the center of population was in the following position:

This point is in southern Indiana, in the western part of Bloomington city, Monroe County.

During the last decade, 1900 to 1910, the center of population moved west 43′ 26″, approximately 39 miles, while its northward movement was only 36″, or approximately seven-tenths of a mile. The westward movement from 1900 to 1910 was nearly three times as great as that from 1890 to 1900, but was less than that for any decade between 1840 and 1890.

The closeness with which the center of population throughout its westward movement has clung to the thirty-ninth parallel of latitude is remarkable. The total westward movement since 1790 is 557 miles.

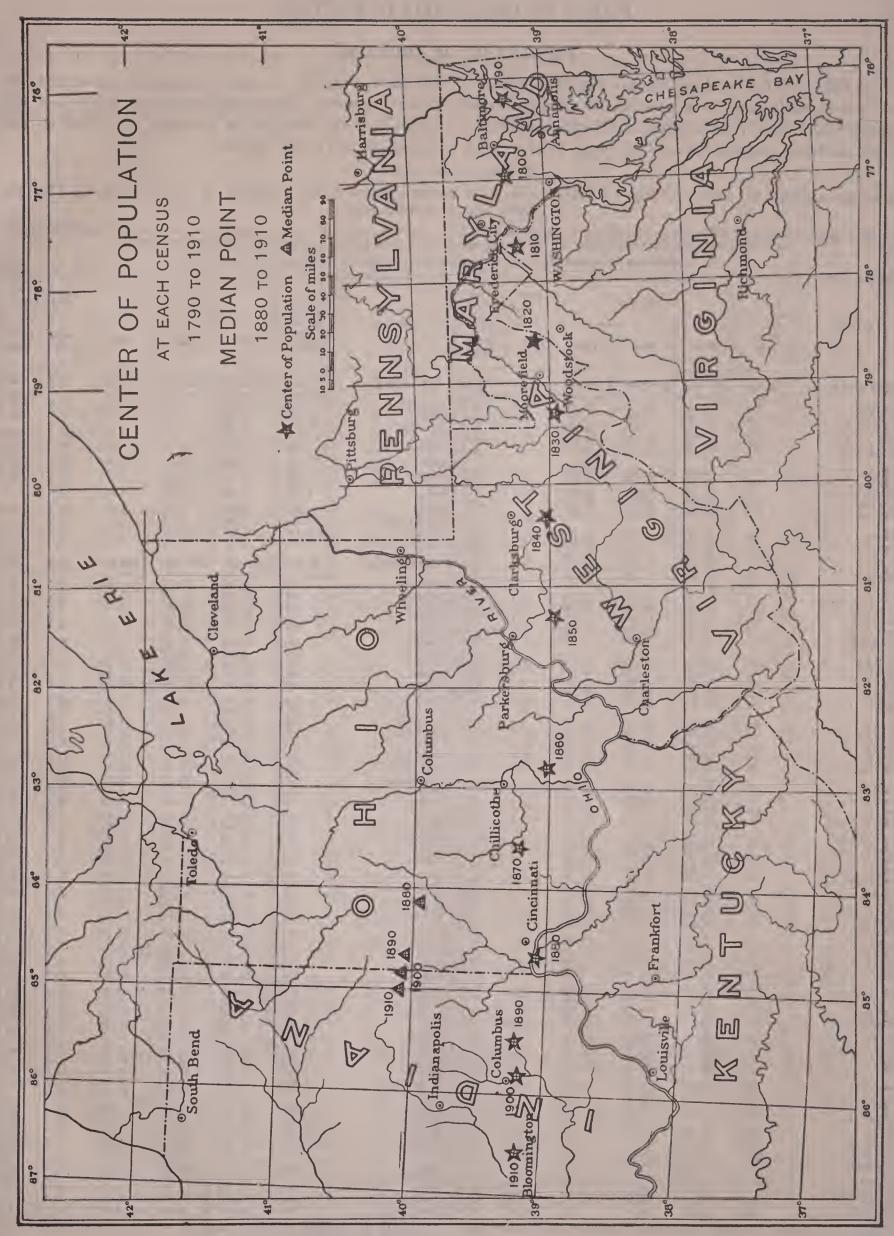

The following table and the map on page 11 show the location of the center of population and its proximity to important towns at each successive Federal census, and its westward advance during each decade since 1790.

In connection with the location of the center of population of the United States it is of interest to note also the position of what may be termed the center of area—that is, the point on which the surface of continental United States would balance if it were a plane of uniform weight per unit of area. This point is located in northern Kansas, 10 miles north of Smith Center, the county seat of Smith County, approximate latitude 39° 55′, longitude 98° 50′, and is therefore about three-fourths of a degree (51 miles) north and

12½ degrees (657 miles) west of the center of population. This would be the center of population if the population were distributed evenly over the territory of continental United States.

In 1910 the median point was located at latitude 40° 6′ 24″ north and longitude 84° 59′ 59″ west, practically the eighty-fifth meridian. Its location, therefore, was 3½ miles south of Winchester, Randolph County, Ind.; its westward movement during the decade was 7.5 miles, its northward movement 2.3 miles.

#### POPULATION OF COUNTIES.

The following tables show the area and population | for such counties as were organized subsequent to in 1910 of each county or equivalent subdivision of continental United States, Alaska, Hawaii, and Porto Rico; also the population in 1900 and 1890, except | comparability of the figures.

these censuses. Notes immediately following the tables indicate changes in counties which affect the

(Text continued on page 34.)

TABLE 3.—AREA AND POPULATION OF COUNTIES AND EQUIVALENT SUBDIVISIONS IN CONTINENTAL UNITED STATES: 1910, 1900, AND 1890.

[In computing the increase from 1890 to 1900 for certain counties the population of Indian reservations in 1900 has been deducted from the total population of the county, in order to make that total comparable with the total for 1890, which does not include the population of Indian reservations.]

1 For changes in boundaries, etc., of counties, see page 33.
2 Includes land area (51 square miles) of that part of Yellowstone National Park in Idaho. No population reported.
3 State total includes population (4,163) of Indian reservations specially enumerated in 1890, not distributed by counties; also, population (6,798) of Alturas and Logan Counties, taken to form Blaine and Lincoln Counties in 1895.

<sup>4</sup> See headnote to table, page 12. <sup>5</sup> State total includes population (1) specially enumerated in 1890, not credited to any county. <sup>6</sup> Less than one-tenth of 1 per cent.

TABLE 3.—AREA AND POPULATION OF COUNTIES AND EQUIVALENT SUBDIVISIONS IN CONTINENTAL UNITED STATES: 1910, 1900, AND 1890—Continued.

<sup>1</sup> For changes in boundaries, etc., of counties, see page 33.
2 Less than one-tenth of 1 per cent.
3 Subdivisions are designated as parishes.

4 State total includes population (1) specially enumerated in 1890, not credited to any parish.

¹ Includes land area (181 square miles) of that part of Ycllowstone National Park in Montana. No population reported.

² State total includes population (2,660) of Crow Indian Reservation, not returned by counties in 1900; returned in 1910 in Rosebud and Yellowstone Counties.

³ State total includes population (10,765) of Indian reservations specially enumerated in 1890, not distributed by counties.

⁴ For changes in boundaries, etc., of counties, see page 33.

<sup>&</sup>lt;sup>5</sup> See headnote to table, page 12.
<sup>6</sup> State total includes population (3.746) of Indian reservations specially enumerated in 1890, not distributed by counties; also population (91) of Arthur County, annexed to McPherson County between 1890 and 1900.

<sup>7</sup> A decrease of less than one-tenth of 1 per cent.
<sup>8</sup> State total includes population (1,594) of Indian reservations specially enumerated in 1890, not distributed by counties.

Table 3.—AREA AND POPULATION OF COUNTIES AND EQUIVALENT SUBDIVISIONS IN CONTINENTAL UNITED STATES: 1910, 1900, AND 1890—Continued.

<sup>3</sup> See headnote to table, page 12. <sup>4</sup> Includes population (2,208) of part of Standing Rock Indian Reservation, not urned by counties in 1900.

¹ For changes in boundaries, etc., of counties, see page 33.
² State total includes population (8,264) of Indian reservations specially enumerated in 1890, not distributed by counties; population (875) of Buford and Flannery Counties, taken to form part of Williams County between 1890 and 1900; and population (563) of Church, Garfield, Stevens, and Wallace Counties, and old Hettinger, Mountraille, Renville, Sheridan, and Williams Counties, annexed to Bottineau, McLean, McHenry, Pierce, Ward, Stark, and Mercer Counties, between 1890 and 1900.

<sup>&</sup>lt;sup>5</sup> Includes population (511) of Fort Yates and Standing Rock Indian Agency.

¹ State total includes population (13) specially enumerated in 1890, not distributed by counties.
² Special census of Oklahoma and Indian Territory, taken as of July 1, 1907, by order of the President.
³ State total includes population (13,873) of Kaw, Kiowa, Comanche and Apache, Osage, and Wichita Indian Reservations; population (2,173) of Day County, part taken to form part of Ellis County in 1907 and part annexed to

Roger Mills County since 1900; and population (392,060) of Indian Territory, not returned by counties in 1900.

4 State total includes population (16,641) of that part of Oklahoma, and population (180,182) of Indian Territory, specially enumerated in 1890, not distributed by counties.

5 For changes in boundaries, etc., of counties, see page 33.

1 For changes in boundaries, etc., of counties, see page 33.

2 State total includes population (9,216) of Cheyenne River and Rosebud Indian Reservations and part of Standing Rock Indian Reservation, not returned by counties in 1900.

3 State total includes population (19,792) specially enumerated in 1890, not distributed by counties; also, population (1,351) of Choteau, Ewing, Harding, Martin, Delano, Scobey, Jackson, Ziebach, Nowlin, Pratt, Presho, and old Todd Counties, annexed to Butte, Meade, Stanley, Lyman, Gregory, and Pennington Counties between 1890 and 1900.

4 Exclusive of population of part in Pine Ridge Indian Reservation, not returned by counties.

See headnote to table, page 12.
Not returned separately.
For 1910 comprises the unorganized counties of Shannon and Washington, and parts of Bennett and Washabaugh, for which the population was not returned

\*\*Separately.

\*\*Total land area within the limits of Pine Ridge Indian Reservation, 4,374 square miles, comprising Shannon, Washington, and parts of Bennett and Washabaugh Counties, included under the respective counties.

County organization went into effect in 1905; comparison for 1890 and 1900 made from population of island groups.
 Figures derived from the census taken as of Dec. 28, 1890, under the direction of the Hawaiian Government.
 Includes population, not returned separately, of territory taken to form Kalawao County in 1905.

NOTES REGARDING CHANGES IN COUNTY BOUNDARIES.

ALABAMA—1900–1910: Organized, Houston; gain in area, Cullman; loss in area, Blount, Dale, Geneva, Henry; both gain and loss, Calhoun, Cleburne. 1890–1900: Gain in area, Clay, Franklin, Walker; loss in area, Jefferson, Lawrence, Talladega; both gain and loss, Colbert.

 ${\tt Arizona-} 1890\text{--}1900:$  Organized, Coconino, Navajo, Santa Cruz; loss in area, Apache, Pima, Yavapai.

Arkansas—1900–1910: Gain in area, Lafayette, Logan, Mississippi, Sebastian; loss in area, Columbia, Scott. 1890–1900: Gain in area, Clay, Crawford, Sevier; loss in area, Franklin, Greene, Howard.

California—1900–1910: Organized, Imperial; gain in area, Kings; loss in area, Fresno, San Diego. 1890–1900: Organized, Glenn, Kings, Madera, Riverside; loss in area, Colusa, Fresno, San Bernardino, San Diego, Tulare.

Colorado—1900—1910: Organized, Adams, Denver, Jackson; gain in area, Park, Washington, Yuma; loss in area, Arapahoe, Denver, Jefferson, Larimer; both gain and loss, Adams. 1890—1900: Organized, Mineral, Teller; loss in area, Chaffee, El Paso, Hinsdale, Rio Grande, Saguaehe; both gain and loss, Fremont.

FLORIDA—1900–1910: Organized, Palm Beach, St. Lucie; loss in area, Brevard, Dade. 1890–1900: Gain in area, Polk; loss in area, Pasco.

GEORGIA—1900-1910: Organized, Ben Hill, Crisp, Grady, Jeff Davis, Jenkins, Stephens, Tift, Toombs, Turner; gain in area, Clarke, Fulton; loss in area, Appling, Berrien, Bulloch, Burke, Clayton, Coffee, Decatur, Dooly, Emanuel, Franklin, Habersham, Irwin, Montgomery, Oglethorpe, Screven, Tattnall, Thomas, Wilcox, Worth.

IDAHO—1900-1910: Organized, Bonner, Twin Falls; gain in area, Fremont, Nez Perce; loss in area, Bingham, Cassia, Kootenai, Shoshone. 1890-1900: Organized, Bannock, Blaine, Canyon, Fremont, Lincoln; loss in area, Ada, Bingham, Lemhi, Kansas—1890-1900: Gain in area, Finney.

Kentucky-1890-1900: Gain in area, Powell; loss in area, Estill.

LOUISIANA—1900-1910: Organized, La Salle; loss in area, Catahoula.

Massachusetts—1 o 00-1910: Gain in area, Hampden, Norfolk; loss in area, Hampshire; both gain and loss, Middlesex, Suffolk.

Michigan—1890–1900: Organized, Dickinson; gain in area, Emmet, Keweenaw, Leelanau; loss in area, Marquette, Menoininee; both gain and loss, Charlevoix, Iron. Minnesota—1900–1910: Organized, Clearwater, Koochiching, Mahnomen, Pennington; loss in area, Beltrami, Itasca, Norman, Red Lake. 1890–1900: Organized, Red Lake, Roseau; gain in area, Crow Wing, Hubbard; loss in area, Cass, Kittson.

Mississippi—1900-1910: Organized, Forrest, George, Jefferson Davis, Lamar; loss in area, Covington, Greene, Hancock, Jackson, Lawrence, Marion, Perry; both gain and loss, Pearl River. 1890-1900: Organized, Pearl River; loss in area, Hancock, Marion.

Montana—1900–1910: Organized, Lincoln, Powell, Rosebud, Sanders; loss in area, Custer, Flathead, Missoula, Silver Bow; both gain and loss, Deer Lodge. 1890–1900: Organized, Broadwater, Carbon, Flathead, Granite, Ravalli, Sweet Grass, Teton, Valley; gain in area, Cascade, Flathead, Lewis and Clark; loss in area, Chouteau, Dawson, Deer Lodge, Jefferson, Meagher, Missoula, Park, Yellowstone.

Nebraska—1900–1910: Organized, Garden, Morrill; gain in area, Dakota; loss in area, Cheyenne, Deuel. 1890–1900: Organized, Boyd; gain in area, McPherson.

NEVADA-1900-1910: Organized, Clark; loss in area, Lincoln.

NEW JERSEY—1890-1900: Gain in area, Ocean; loss in area, Burlington.

New Mexico—1900—1910: Organized, Curry, Guadalupe, Luna, McKinley, Quay, Roosevelt, Sandoval, Torrance; loss in area, Bernalillo, Chaves, Dona Ana, Grant, Guadalupe (old), Lincoln, Quay, Roosevelt, San Juan, San Miguel, Santa Fe, Socorro, Union, Valencia; both gain and loss, Rio Arriba. 1890—1900: Organized, Chaves, Eddy, Guadalupe (old), Otero, Union; gain in area, Bernalillo; loss in area, Colfax, Dona Ana, Lincoln, Mora, San Miguel, Santa Fe, Socorro.

NEW YORK—1890-1900: Organized, Nassau; gain in area, New York; loss in area,

NORTH CAROLINA—1900-1910: Organized, Lee, Scotland; loss in area, Chatham, Moore, Richmond.

NORTH DAKOTA—1900–1910: Organized, Adams, Bowman, Burke, Divide, Dunn, Hettinger, McKenzie, Mountrail, Renville, Sheridan; loss in area, Billings, McLean, Mercer, Stark, Ward, Williams. 1890–1900: Organized, Williams, gain in area, Billings, Bottineau, McHeury, McLean, Mercer, Pierce, Stark, Ward; loss in area, Dunn, Hettinger, Renville, Sheridau, Williams.

OKLAHOMA: Most of the counties were organized in 1907. Among the few existing In 1890 there was no change till after 1900. There has been no later change in Cleveland, Kingfisher, Logan, and Oklahoma, but since 1900 Canadian has gained in area, Beaver and Payne have lost, while Greer has had both gains and losses. The counties organized between 1890 and 1900 were formed from Indian reservations. Of these counties the following remain unchanged: Dewey, Garfield, Grant, Lincoln, and Pottawatomie; there has been a gain in area in Blaine, Custer, Kay, Noble, Pawnee, and Washita, and both gains and losses in Roger Mills, Woods, and Woodward. For comparison of the special enumeration of 1907 with that of 1910 it may be noted that Harmon was organized in 1909; there was a loss of area in Beckham and both gain and loss in Greer.

Oregon—1900–1910: Organized, Hood River; gain in area, Baker; loss in area, Union, Wasco. 1890–1900: Organized, Lincoln, Wheeler; gaiu in area, Sherman, Wallowa; loss in area, Benton, Crook, Gilliam, Grant, Tillamook, Union, Wasco.

SOUTH CAROLINA—1900–1910: Organized, Calhoun, Dillon, Lee; gain in area, Florence, Newberry; loss in area, Berkeley, Darlington, Kershaw, Lexington, Marion, Sumter, Williamsburg; both gain and loss, Orangeburg. 1890–1900: Organized, Bamberg, Cherokee, Dorchester, Greenwood, Saluda; gain in area, Charleston, Florence; loss in area, Abbeville, Barnwell, Berkeley, Colleton, Darlington, Edgefield, Spartanburg, Union, York.

SOUTH DAKOTA—1900-1910: Organized, Corson, Harding, Perkins, Tripp; loss In area, Butte, Union; formed, Bennett, Mellette, Todd. 1890-1900: Gain in area, Butte, Gregory, Lyman, Meade, Pennington, Stanley.

TENNESSEE—1900-1910: Gain in area, Perry; loss in area, Lauderdale, Wayne. 1890-1900: Gain in area, Lewis; loss in area, Hickman, Wayne.

TEXAS—1900–1910: Organized, Andrews, Dawson, Gaines, Garza, Gray, Hutchinson, Lamb, Lynn, Parmer, Reagan, Schleicher, Terrell, Terry, Upton, Winkler, Yoakum; loss in area, Pecos, Tom Green. 1890–1900: Organized, Foard, Sterling; gain in area, Brewster, Webb; loss in area, Hardeman, Knox, Tom Green.

UTAH—1900–1910: Gain in area, Sevier; loss in area, Piute. 1890–1900: Organized, Carbon, Grand, Wayne; gain in area, Garfield, Utah; loss in area, Emery, Kane, Piute, Sanpete.

VERMONT-1890-1900: Gain in area, Caledonia; loss in area, Washington.

VIRGINIA—1900–1910: Organized and made independent of county, Clifton Forge city; gain in area, Danville city, Lynchburg city, Norfolk city, Portsmouth city, Richmond city, Staunton city; loss in area, Alleghany, Augusta, Campbell, Henrico, Manchester city, Norfolk, Pittsylvania. 1890–1900: Organized and made independent of county, Buena Vista city, Newport News city, Radford city; gain in area, Danville city, Portsmouth city, Roanoke city; loss in area, Montgomery, Norfolk, Pittsylvania, Roanoke, Rockbridge, Warville, Campbella, Cambbella, Cam

Washington—1900–1910: Organized, Benton, Grant; loss in area, Douglas, Klickitat, Yakima. 1890–1900: Organized, Chelan, Ferry; loss in area, Kittitas, Okanogan, Stevens.

West Virginia—1890–1900: Organized, Mingo; loss in area, Logan.

WISCONSIN—1900–1910: Organized, Rusk; gain in area, Oneida; loss in area, Chippewa, Forest; both gain and loss, Vilas. 1890–1900: Organized, Iron, Vilas; loss in area, Ashland, Forest; both gain and loss, Oneida.

WYOMING—1900–1910: Organized, Park; loss in area, Bighoru. 1890–1900: Organized, Bighorn, Natrona, Weston; loss in area, Carbon, Crook, Fremont, Johnson.

Porto Rico—1899–1910: Municipality organized, Culebra; gain in area, Humacao, Mayaguez; loss in area, Vieques.

#### URBAN AND RURAL POPULATION.

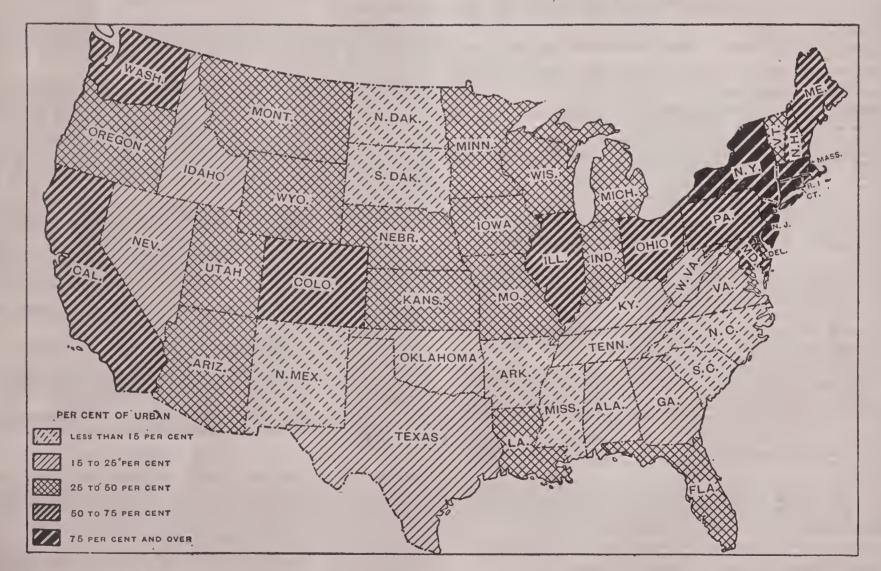

The Census Bureau classifies as urban population that residing in cities and other incorporated places of 2,500 inhabitants or more, including New England towns of that population. In most sections of the country all or practically all densely populated areas of this size are set off from rural territory and incorporated as municipalities (variously known as cities, towns, villages, boroughs, etc.). In New England, however, this is often not the case. Many of the towns consist in part of distinctly rural territory and in part of densely populated areas which are not incorporated separately and for which it is impossible to make separate population returns. For this reason it has been necessary in the New England states to include with the urban population residing in incorporated cities the population also of all towns having 2,500 inhabitants or more. The urban areas in New England, as classified by the census, therefore, include some population which, in other sections of the United States, would be segregated as rural.

Urban population being thus defined, the remainder of the country is classed as rural, consisting

(except in New England) of all unincorporated territory and of incorporated places of less than 2,500 inhabitants.

The comparisons of the urban and rural population in 1910 with that at earlier enumerations may be made either with respect to the varying proportions of the two classes at successive enumerations or with respect to the increase between enumerations. In order to contrast the proportion of the total population living in urban or rural territory at the census of 1910 with the proportion urban or rural at the preceding census, it is necessary to classify the territory according to the conditions as they existed at each census. In this comparison a place having less than 2,500 inhabitants in 1900 and over 2,500 in 1910 is classed with the rural territory for 1900 and with the urban for 1910. On the other hand, in order to present fairly the contrast between urban and rural communities, as regards their rate of growth, it is necessary to consider the changes in population which have occurred from one decennial census to another in exactly the same territory.

PER CENT OF URBAN IN TOTAL POPULATION, BY STATES: 1910.

Proportion urban and rural.—The proportion of the total population living in urban and in rural territory at the censuses of 1910, 1900, 1890, and 1880, respectively, for continental United States, is shown in the table on the opposite page.

This table shows a steady and rapid increase in the proportion of urban population. While the increase in the percentage of urban population from 1900 to 1910 was appreciably greater than from 1890 to 1900, it was not so great as from 1880 to 1890.

	POPULATION OF CONTINENTAL UNITED STATES.								
CLASS.	1910	1900	1890	1880					
Total	91,972,266 42,623,383 49,348,883	<b>75,994,575</b> 30,797,185 45,197,390	<b>62,947,714</b> 22,720,223 40,227,491	50,155,783 14,772,438 35,383,345					
	PER CENT DISTRIBUTION.								
Total. Urban Rural.	100.0 46.3 53.7	100.0 40.5 59.5	100.0 36.1 63.9	100.0 29.5 70.5					

The map on page 34 shows the percentage of urban population in 1910 for each of the states.

Table 5 (p. 36) shows, by divisions and states, urban and rural population, and the per cent urban and rural, at the censuses of 1910, 1900, and 1890, respectively. As shown by this table, the proportions of the total population living in urban and rural territory vary greatly for the different sections of the country.

In the New England division more than four-fifths of the population in 1910 lived in urban territory, as defined by the Census Bureau. Were it possible to determine the urban population in this division on the same basis as for the rest of the country, the proportion would probably be somewhat less than three-fourths. In the Middle Atlantic division the urban population constituted more than seven-tenths of the total; the proportion for the state of New York was very nearly four-fifths. In the East North Central and Pacific divisions the urban territory contained more than onehalf of the total population in 1910. The lowest proportion of urban population is found in the South—25.4 per cent in the South Atlantic division, 18.7 per cent in the East South Central, and 22.3 per cent in the West South Central.

In each of the nine geographic divisions the proportion of the population living in urban communities was larger in 1910 than in 1900, and larger in 1900 than in 1890. The proportion increased with exceptional rapidity from 1900 to 1910 in the Pacific division, where cities have shown a very remarkable growth.

The per cent distribution of the total, urban, and rural population, respectively, of continental United States in 1910 among the nine geographic divisions is as follows:

GEOGRAPHIC DIVISION.	PER CENT DISTRIBUTION OF THE POPULATION IN 1910 AMONG GEOGRAPHIC DIVISIONS.						
	Total.	Urban.	Rural.				
Continental United States New England	100.0	100.0 12.8	100.0				
Middle Atlantic	21.0 19.8	32. 2 22. 6	11.3 17.5				
West North Central. South Atlantic.	13.3	9.1	15.7 18.4				
East South Central.  West South Central.  Mountain.	0 0	$\begin{bmatrix} 3.7 \\ 4.6 \\ 2.2 \end{bmatrix}$	13.9 13.8 3.4				
Pacific	4.6	5.6	3.7				

Increase in urban and rural population.—In order to compare the rate of growth in urban and rural communities, it is necessary in each case, as previously explained, to consider the changes in population which have occurred in the same territory from one decennial census to another. For this purpose communities are classed as urban or rural according to their population in 1910, and the population of the places as thus classified is then determined for 1900 for purposes of comparison.

The increase from 1900 to 1910 in urban and rural population on this basis is shown, for continental United States, in the following table:

•	POPULAT	ION IN—	INCREASE, 1900-1910.			
CLASS.	1910	1900	Number.	Per cent.		
Total population. Urban territory in 1910. Rural territory in 1910.	91,972,266 42,623,383 49,348,883	<b>75,994,575</b> 31, 609, 645 44, 384, 930	15,977,691 11,013,738 4,963,953	21.0 34.8 11.2		

The rate of increase for the population of urban areas was over three times that for the population living in rural territory.

Of the total increase in the population of continental United States during the past decade (15,977,691), seven-tenths was in urban territory and only three-tenths in rural territory.

Table 6 (p. 37) shows, by divisions and states, the aggregate population in 1910 and 1900 of the territory which is classed as urban and rural in 1910, and the increase or decrease during the decade.

The largest percentages of increase in urban population since 1900 are reported for the Pacific, West South Central, and Mountain divisions, in the order named, these percentages being 101.8, 68.5, and 64.7, respectively. These same divisions also show higher rates of increase in rural population than any of the others, though the increase in rural population was much less rapid than that in urban population, being for these divisions 46.4, 27.1, and 53.4 per cent, respectively.

The New England division, on the other hand, shows the smallest percentage of increase in urban population, namely, 21.5 per cent. For this division there has been a slight decrease in rural population during the past decade.

The five other geographic divisions differ little from one another in the percentages of increase in urban population, the rates ranging from 28.2 per cent for the West North Central division to 33.1 per cent for the Middle Atlantic division. They show greater contrasts in the growth of rural population. In the South Atlantic division the increase in rural population was 12.3 per cent; in the Middle Atlantic, West North Central, and East South Central divisions it was between 5 and 10 per cent, and in the East North Central division there has been a slight decrease in rural population.

Table 5.—URBAN AND RURAL POPULATION, AND PER CENT URBAN AND RURAL, BY DIVISIONS AND STATES: 1910, 1900, AND 1890.

<sup>1</sup> A minus sign (-) denotes decreasc.

 $<sup>^{2}</sup>$  A decrease of less than one-tenth of 1 per cent.

PER CENT OF INCREASE IN URBAN POPULATION, BY STATES: 1900-1910.

PER CENT OF INCREASE IN RURAL POPULATION, BY STATES: 1900-1910.

There has been in every state since 1900 an increase in urban population, but in six states—namely, New Hampshire, Vermont, Ohio, Indiana, Iowa, and Missouri—there has been a decrease in rural population. In all but two states—Montana and Wyoming—the urban population has increased faster than the rural population, and generally at a much more rapid rate.

The decrease or slow increase in the rural population

throughout large areas is in no sense due to lack of agricultural prosperity. On the contrary, in almost all such areas there has been a remarkable increase in the value of farm property.

The maps on page 38 show the increase or decrease in urban and in rural population since 1900 for each state, different rates of growth being indicated by differences in the shading.

## COMMUNITIES CLASSIFIED ACCORDING TO SIZE.

Proportion in the several classes of communities.—In addition to classifying the population according to the broad grouping into urban and rural, a further analysis may be made on the basis of a more detailed size classification. The following table shows, for conti-

nental United States, the number of places constituting each of the specified classes of cities at the censuses of 1910, 1900, and 1890, the combined population of each group, and the percentage which each group represents of the total population of the country:

¹ The total number of cities of certain classes for the United States as a whole, and for certain geographic divisions, is less than the sum of the numbers shown for the individual states of the country or of the division for the reason that three cities each lie in two adjoining states, namely, Bristol (Virginia-Tennessee), Texarkana (Arkansas-Texas), and Union City (Indiana-Ohio), and are therefore counted twice. Moreover, one of these cities—Bristol—lies in two different geographic divisions (South Atlantic and East South Central). Each of these cities consists of two incorporated municipalities, but each is, from the statistical standpoint, one city, and should be classed according to its total population. In each case that part of the population lying in each state, whatever its number, is credited to the group of cities to which, according to the total population, the city belongs. According to total population Bristol fell in 1910 in the class of cities of 10,000-25,000; in 1900 and in 1890, in the class 5,000-10,000; Texarkana fell in 1910 and 1900 in the class of 10,000-25,000, and in 1890 in the class 5,000-10,000; and Union City fell at each census from 1890 to 1910 in the class of 2,500-5,000.

In addition to the 46.3 per cent of the total population which in 1910 resided in communities classed by the Census Bureau as urban, 8.8 per cent resided in incorporated places of less than 2,500 inhabitants, making in all 55.1 per cent residing under conditions more or less urban in character.

Nearly one-tenth (9.2 per cent) of the total population in 1910 resided in the three cities (New York, Chicago, and Philadelphia) which had more than 1,000,000 inhabitants each. If 100,000 inhabitants be taken as the dividing line between large and medium-sized cities, it is seen that 22.1 per cent of the population resided in such large cities. In cities of medium size, ranging from 25,000 to 100,000 inhabitants, 8.9 per cent of the population resided, while the small urban communities of from 2,500 to 25,000 inhabitants contained 15.3 per cent.

Comparing the percentages for the three censuses, it is seen that each of the several groups of communities classed as urban comprised a larger percentage of the population of the country in 1910 than in 1900, and that, with two exceptions, each class in 1900 com-

prised a larger percentage of the total population than in 1890.

The percentage which the population of each class of cities represents of the total population of the several divisions in 1910 is as follows:

	PER CENT OF POPULATION IN 1910 LIVING											
GEOGRAPHIC DIVISION.		(	Cities of—	<b>-</b>		Rural						
		25,000 to 100,000.			2,500 to 5,000.	dis- tricts.

Growth of the several classes of urban communities.— In comparing the growth of the several classes of urban communities from 1900 to 1910, each community is grouped, for both censuses, according to its population in 1910, so as to avoid the disturbing effect of the passage of communities from one group to another. The population shown for 1900 represents, so far as it could be ascertained, the population within the boundaries of the communities as constituted in 1910. The comparison for continental United States as a whole is presented in the following table. With one exception there is no very great difference in the rates of growth of the several classes of urban communities. There are two groups in which the increase in population since 1900 is somewhat more than 40 per cent, namely, cities of from 100,000 to 250,000 inhabitants and those of from 50,000 to 100,000. For all but one of the other groups the increase was between 30 and 40 per cent. The remaining group—that comprising five cities having in 1910 from 500,000 to 1,000,000

inhabitants—shows an increase during the decade of barely 20 per cent.

## METROPOLITAN DISTRICTS.

In its general tables dealing with the population of cities, the Bureau of the Census must necessarily deal with political units, or, in other words, with the population contained within the municipal boundaries of each city. It is a familiar fact that, in some cases, the municipal boundaries give only an inadequate idea of the population grouped about one urban center. In the case of many cities there are suburban districts with a dense population outside the city limits, which, in a certain sense, are as truly a part of the city as the districts which are under the municipal government.

It seems desirable, therefore, to show the magnitude of each of the principal population centers taken as a whole. Statistics have been compiled for each city in the United States with a population of 200,000 inhabitants or more, which, in addition to the population within the city limits, show the population in adjoining communities which may be considered as intimately associated with the urban center. Such districts are designated as "metropolitan districts."

In laying out such metropolitan districts the population is first determined for all civil divisions (that is, cities, towns, boroughs, townships, precincts, etc.) located within 10 miles of the city boundaries. Divisions which lie partly within and partly without the 10-mile limit are included if either one half of their total population or one-half of their total area comes within that limit. State boundaries are disregarded, so that in some cases the metropolitan district lies partly in two states.

From the territory lying within the limits thus determined there have been deducted all divisions which have a population of less than about 150 or 200 inhabitants per square mile. Where the density of population is less, the division may be considered as rural rather than urban in character, and is not properly a part of the metropolitan district. There are a few exceptions to this rule where a minor civil division has been included within the metropolitan district, even though it had a lower density than that just stated, because that division was completely or almost surrounded by other civil divisions having a density which would require them to be included. The exception in such cases seems justified in order to avoid undue irregularity in the shape of the districts, or gaps lying wholly within their area.

Since a strict application of the rules for determining the metropolitan district of Boston would give an area

almost identical with the area of the "industrial district" of Boston, as laid out in a previous census bulletin (1909), the latter area is for convenience of comparison considered as the metropolitan district. The same is true of New York City, except that Nassau County, which was not included in the industrial district, has been added to the metropolitan district. In the case of the other industrial districts shown in the bulletin mentioned, the areas were so different from the metropolitan districts, as determined by the application of the rule here described, that no attempt was made to secure conformity.

Table 7 on the next page shows for 1910 and 1900 the population of 25 metropolitan districts as defined by the Census Bureau, distinguishing the population lying within the city proper from that outside the city. The cities are arranged in the order of the aggregate population of the metropolitan district.

It will be noted that two cities of 200,000 inhabitants or more—Newark and Jersey City—do not appear in the table, for the reason that they are included within

the metropolitan district of New York.

The importance of the suburbs of great cities is conspicuously indicated by the combined statistics for the 25 metropolitan districts, which appear at the top of the table. The combined population of the metropolitan districts in 1910 was 22,088,331, of which 17,099,904 represents the population of the central cities and 4,988,427 that of the suburban areas, the latter being equal to nearly 30 per cent of the population of the cities proper. The figure of 17,099,904 represents the population of 28 cities, since there are three metropolitan districts in each of which there are two cities of such large population that both are treated as the central cities of the district, namely, Minneapolis and St. Paul; Kansas City, Kans., and Kansas City, Mo.; and San Francisco and Oakland.

The table shows further that the population of the metropolitan districts lying outside of the central cities has increased somewhat more rapidly than that within their boundaries, the increase since 1900 being 43 per cent for the suburban districts and 33.2 per

cent for the cities proper.

The table emphasizes the well known fact that the cities of the country have quite a different rank when their suburbs are taken into account from that which they hold when only the population within the city boundaries proper is considered.

Providence district.—Pawtucket city, 51,622; Warwick town, 26,629; Central Faiis city, 22,754; Cranston city, 21,107; East Providence town, 15,808; Cumberiand town, 10,107; Lincoln town 9,825; Johnston town, 5,935; North Providence town, 5,407.
Washington district.—Alexandria city (Va.), 15,329.

Washington district.—Alexandria city (Va.), 15,329.

Kansas City (Mo. and Kans.) district.—Rosedale city (Kans.), 5,960.

Louisville district.—Indiana: New Albany city, 20,629; Jeffersonville city, 10,412.

## POPULATION OF INDIVIDUAL CITIES.

The statistics of population for individual cities and other incorporated places having, in 1910, 2,500 inhabitants or more are given in detail in Tables 8 and 9.

Table 8 shows the population of cities having, in 1910, 25,000 inhabitants or more as reported at the censuses of 1910, 1900, and 1890, with the per cent of increase from 1900 to 1910 and from 1890 to 1900.

Table 9 (pp. 45 to 55) shows the population of incorporated places and New England towns having, in 1910, 2,500 inhabitants or more, alphabetically arranged by states, as reported at the last three Federal censuses, namely, those of 1910, 1900, and 1890.

In using the figures given in these tables, it should be remembered that, in some instances, the growth of a city or other incorporated place may have been due in part to annexation of suburban territory. Except in the cases of New York City, Pittsburgh, and a few other similar consolidations mentioned in footnotes

to these tables, no allowance has been made for such annexations.

Of the 225 cities of 25,000 inhabitants or more for which comparative figures for the two decades are given, 153 show a greater absolute increase in the decade 1900 to 1910 than in the preceding decade, and 114 of these show also a higher percentage of increase.

As regards rates of increase from 1900 to 1910, the cities having at least 25,000 inhabitants are distributed as shown in the following table:

RATE OF INCREASE, 1900-1910.	Continental United States.	Northern states.	Southern states.	Western states.
Total Over 100 per cent 70 to 100 per cent 50 to 70 per cent 30 to 50 per cent 20 to 30 per cent 10 to 20 per cent Under 10 per cent Decrease.	17 29 54 47 42	167 4 9 22 46 39 36 9 2	44 9 7 3 6 6 6 6 6	18 9 1 4 2 2
